Profile

Over the past 6 years I have held Frontend/Backend developer role in the field of Web/Mobile Application development.

I have worked in native/cross-platform development for my entire developing career and my commitment to critical thinking, attention to detail and a desire to stay updated on current and new technologies have gotten me to where the senior full stack developer in my work.

Due to pandemic, I had to work as a remote worker and realized that it was so exciting and efficient method.

I'm always interested in making long term professional relationships with my clients to ensure that every project becomes successful.

Professional Experience

2017 – 2018

Austin, Texas

Senior Web/Mobile Developer / PM in Autofixie LLC | Contract

I spent over 1,000+ hours of intensive training where I have enhanced the skills to be an efficient Full Stack Developer, with a strong understanding of problem-solving, critical thinking, and software engineering that maintain, develop and deploy fully functional dynamic web/mobile application from scratch.

Projects

2022/06 – 2023/06

Backend System Conversion

<https://infcurion.com/>

Incurion is a website that provides platforms, consulting, etc. centered on the financial and payment fields. It provides various services, employment information, and news and inquiry.

Project: <https://www.koyfin.com/cetf>

Tech: PHP/Laravel to Python/Django

2020/10 – 2022/06

React Frontend developer

Sun Asterisk Inc

Working for this company was my golden period, I got many opportunities to develop extended web applications. I extended my skills larger to the frontend part based on backend experience and I started to approach full stack more easily.

What I tried to join to develop are as follows:

- <https://whatsyourgusto.com>
- <https://aliabdaal.com/articles>
- <https://www.leifshop.com>
- <https://debut.shonenmagazine.com>

2018/09 – 2020/10
